

## **Examples of Effective Objectives:**

At the end of this activity, the participant will demonstrate the ability to—

- Identify shoulder anatomy on a diagram
- Recognize four common causes of shoulder pain
- Compare and contrast several management strategies to patients with chronic shoulder pain.

After attending this activity the participant will demonstrate the ability to—

- Describe the current clinical practice for the treatment of primary and metastatic brain and spinal cord tumors in adults and children
- Evaluate the process of translating laboratory research into clinical trials for patients with malignant gliomas
- Outline current advances in molecular biology, immune therapy, stem cell therapeutics and drug delivery systems for brain tumors
- Identify challenges caregivers face in caring for patients with brain tumors
- Recognize quality of life issues for patients with brain tumors and the effectiveness of measurement tools

Please note: Goals are broad statements of the aims of an activity; objectives are precise, measurable results that the learner is expected to accomplish.
